

## Programming 512 Practical 2

### Sequential Files

- Take the screenshot of the user interface put it in the word doc, Copy the code paste it on word document, run the code for all possible scenarios to take screenshots and paste it to the word doc.
- Rename your document as name\_icasNo\_qualification eg Noble\_Nzama\_12354\_Bsc1styear then convert it to PDF and submit it into this link <https://www.dropbox.com/request/zU1eBKD5fU12Y9I2Wens> before Friday 00:00 (21/08/2020)

1. Create the form below and implement the two buttons “calculate “and “retrieve”.

- 1.1. When the user has inputted the Item, and quantity the program must calculate the total and save the information in the text file in a format, Item||||| Quantity|||||price.
- 1.2. The items are orange, banana, apple and grapes, and they cost R5, R6, R3 and R10 respectively.
- 1.3. When the button retrieve pressed, all the content in the file must be displayed in the textbox.
